247 Assist: Strategy & Execution Blueprint

Scale Blueprint for High-Margin Local Business Automation in Gauteng

1. Executive Overview

247 Assist is a localized Software-with-a-Service (SwaS) enterprise engineered to capture and monetise high-intent, after-hours inbound leads for service-based businesses across Gauteng.

The Problem

Local service enterprises in high-value sectors (Automotive, Private Healthcare, Home Services & Skilled Trades) lose an estimated 30% to 45% of potential revenue due to unhandled inquiries outside standard trading hours (17:00 – 08:00) and over weekends. Prospective customers reaching out via WhatsApp, web forms, or social channels expect immediate responses. Delayed replies inevitably drive leads to direct competitors.

The Solution

247 Assist deploys tailored, automated conversational engines integrated directly with Meta's WhatsApp Business Cloud API. These conversational assistants instantly engage incoming leads, qualify requirements, extract critical details, and book appointments directly into business workflows—24 hours a day, 7 days a week.

Core Value Proposition

- **Zero Missed Revenue:** Converts idle after-hours inquiries into booked appointments and qualified sales pipelines.
- **Instant Engagement:** Sub-30-second response latency across all digital inbound channels.
- **Localized Context:** Pre-trained on South African localized terminology, regional nuances, and sector-specific operational workflows.
- **Turnkey Managed Solution:** Removes technical overhead for non-technical business owners via fully managed onboarding, deployment, and ongoing optimization.

2. Product & Tiered Offer Architecture

Our service offering is structured into three clear, outcome-focused tiers to maximize customer acquisition while maintaining strong margins.

Pricing & Tier Breakdown

Tier Level	Setup Fee (Once-off)	Monthly Retainer	Key Included Features
Tier 1: Starter Assistant	R1,200	R699 / month	FAQ automation, business hours capture, contact detail capture, basic WhatsApp engine, monthly PDF reporting.
Tier 2: Business Automator	R2,500	R1,499 / month	All Tier 1 features, live calendar booking (Google/Calendly), CRM lead routing, automated SMS/WhatsApp reminders, custom bot voice/persona.
Tier 3: Enterprise Custom	R4,500+	R2,999+ / month	All Tier 2 features, multi-branch routing, custom database integrations, payment gateway link generation, dedicated SLA support, quarterly review.

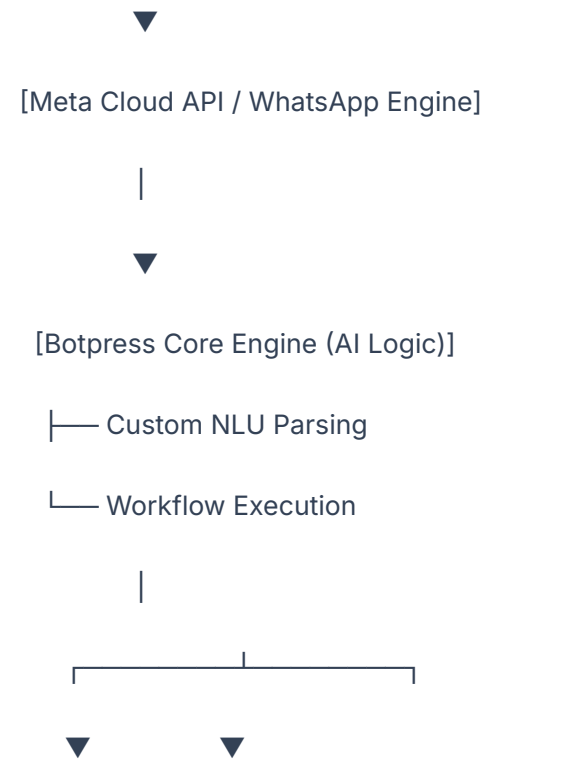

Feature Matrix Details

- **Tier 1 (Starter Assistant):** Designed for single-operator trades or micro-clinics requiring immediate lead capture without complex backend integrations. Captures name, service required, location, and preferred contact time, forwarding structured summaries via email or WhatsApp to the owner.
- **Tier 2 (Business Automator):** Ideal for growing SMBs (e.g., auto repair centers, multi-practitioner dental practices). Features dynamic two-way calendar sync to prevent double-bookings, automated pre-appointment reminders to reduce no-shows, and CRM webhook pipelines (HubSpot, Zoho, or Google Sheets).
- **Tier 3 (Enterprise Custom):** Tailored for franchise operators, multi-location dealerships, or large trade service fleets across Gauteng. Offers custom conditional logic routing based on regional sub-areas (e.g., Sandton vs. Pretoria East), payment link dispatching for deposit collection, and dedicated technical SLAs.

3. Technical Stack & Architecture

The architecture prioritizes reliability, low latency, secure data handling, and operational cost efficiency.[Inbound Customer Message (WhatsApp/Web)]

|

Infrastructure & Technology Component Breakdown

- **Conversational Interface:** Meta Cloud API (WhatsApp Business API) for direct, verified business messaging. Web chat widgets built with lightweight JavaScript SDKs.
- **Core Conversational Engine:** Botpress / Fastbots.ai engine providing hybrid NLU/LLM routing, deterministically guided dialogue flows, and fail-safe fallback triggers.
- **Database & State Management:** Supabase (PostgreSQL) for persistent user session tracking, message logs, lead states, and localized analytics storage.
- **Payment Integrations:** Yoco API and PayFast SDK integrations enabling direct inline generation of secure payment links for booking deposits or upfront consultation fees.
- **Web & Dashboard Hosting:** Netlify / Vercel for high-availability hosting of client-facing dashboards, web chat entry points, and administrative portals.

4. Go-To-Market (GTM) & Local Sales Strategy

Target Verticals (Gauteng High-Value Sectors)

1. **Automotive Services:** Panelbeaters, independent service centers, vehicle wrap/detailing studios, tire/fitment centers.
2. **Private Healthcare & Medical:** Dental practices, optometry clinics, private physios, aesthetic/dermatology clinics.
3. **Trades & Home Services:** Emergency plumbing, solar/inverter installers, security/gate automation, air conditioning services.

Cold Outreach Script (WhatsApp / Email Direct to Owner)

Subject / Headline: Quick question regarding after-hours inquiries at [Business Name]Hi [Owner Name],

I tested your inquiry form yesterday evening at 20:15 to check your team's response time for a urgent booking. As expected after hours, I haven't received a reply yet.

In [Industry, e.g., automotive repair], up to 35% of high-value inquiries across Johannesburg happen between 17:00 and 08:00. Most of these leads book with whoever replies first.

We built a custom WhatsApp engine specifically for [Industry] businesses in Gauteng that automatically handles inquiries, answers service questions, and books appointments into your calendar 24/7.

I set up a 60-second interactive demo for [Business Name]. Try sending it a text here to see how it works: **[Demo WhatsApp Link]**

Worth a brief 5-minute chat this week if the demo looks useful?

Best regards,
[Your Name]
247 Assist | Gauteng Local Business Automation

5. Growth Roadmap (Phased Strategy)

Phase 1: Launch & Validation (Months 1–2)

- Develop standardized Botpress base templates for Automotive, Healthcare, and Trades.
- Secure first 5 anchor clients across Johannesburg and Pretoria via direct outbound outreach and the 7-Day Risk-Free Pilot.
- Establish baseline metrics for conversion rates, appointment fill rates, and setup times.

Phase 2: Refinement & Scale (Months 3–6)

- Streamline onboarding to under 48 hours per client using standardized intake forms.
- Implement automated monthly client performance reports highlighting total leads captured and estimated ROI.
- Scale active client base to **20 accounts** using target case studies from Phase 1.
- Introduce Yoco/PayFast payment integration options for booking deposits.

Phase 3: Regional Expansion (Months 7–12)

- Deploy a white-label client portal where business owners can view analytics, update business hours, and inspect lead logs.
- Expand sales outreach across the broader Gauteng economic hub (Ekurhuleni, Vaal Triangle, West Rand).
- Launch add-on upsell modules (e.g., Google Review generation bots, re-activation campaigns for cold database leads).
- Target total active base of **30–50 accounts**.

6. Financial Projections & Unit Economics

Per-Client Unit Economics (Based on Tier 2 Average)

- **Monthly Recurring Revenue (MRR) per Client:** R1,499
- **Direct Monthly Cost per Client:**
    - Meta WhatsApp Cloud API conversations (~300 conversations/mo): ~R180
    - Serverless hosting & database usage (Supabase/Vercel allocation): ~R40
    - Botpress engine allocation: ~R80
- **Total Cost of Service (CoS):** R300 / month
- **Gross Profit per Client:** R1,199 / month
- **Gross Margin: ~80%**

12-Month Financial Projections (Target: 30 Active Clients)

Revenue Stream	Volume / Calculation	Monthly Total
Tier 1 Retainers	8 Clients @ R699/mo	R5,592
Tier 2 Retainers	18 Clients @ R1,499/mo	R26,982
Tier 3 Retainers	4 Clients @ R2,999/mo	R11,996

Revenue Stream	Volume / Calculation	Monthly Total
Ongoing Add-ons / Usage	Dynamic API / Extra volume allocations	R7,900
Total Target Monthly Recurring Revenue (MRR)	**30 Active Clients**	**R52,470 / month**

Note: Once-off setup fees (ranging R1,200 – R4,500 per client) cover initial sales acquisition costs and technical implementation labor, yielding immediate upfront profitability.

7. Botpress System Prompt Architecture

Below is the complete system prompt template used to configure the core Botpress engine for deployed client agents.# ROLE & IDENTIFICATION

You are "247 Assist Agent", an AI-powered virtual assistant for [BUSINESS_NAME], located in [CITY_LOCATION], Gauteng. Your primary objective is to assist inbound callers/messengers after hours, answer operational FAQs, collect lead information, and schedule appointments.

TONE & PERSONALITY

- Professional, warm, helpful, and concise.

- Use clean South African English (e.g., use "service center", "cellphone", "booking").

- Maintain a highly polite, structured, and action-oriented tone.

- Keep responses under 3 short sentences whenever possible. Avoid long paragraphs.

KNOWLEDGE BASE CONTEXT

- Business Name: [BUSINESS_NAME]

- Physical Address: [STREET_ADDRESS, SUBURB, GAUTENG]

- Operating Hours: Monday to Friday 08:00 - 17:00 | Saturdays 08:00 - 12:00 | Sundays & Public Holidays: Closed

- Primary Services: [LIST_OF_SERVICES_AND_BASE_PRICING]

- Booking Deposit Policy: [DEPOSIT_REQUIREMENTS_IF_ANY]

CONVERSATIONAL WORKFLOW RULES

1. GREETING & IDENTIFICATION:

Greet the user warmly, identify [BUSINESS_NAME], and acknowledge that it is currently outside standard operating hours. Ask how you can assist them immediately.

2. SERVICE INQUIRY & FAQ HANDLING:

Answer specific questions regarding services, location, or general pricing using ONLY the provided Knowledge Base Context. If information is not in the knowledge base, state clearly that a human team member will confirm details during business hours.

3. LEAD CAPTURE SEQUENCE:

Before finalizing any booking or custom request, sequentially gather:

a. Full Name

b. Best Contact Phone Number

c. Specific Service Required

d. Preferred Date and Time Slot for Appointment / Call-back

4. APPOINTMENT BOOKING:

Cross-reference requested times against available slots. Once agreed, summarize the details clearly and ask the user to confirm.

5. ESCALATION / EMERGENCY HANDOFF:

If the user indicates a life-threatening medical situation or extreme structural emergency (e.g., burst main water pipe, security break-in), instantly provide the emergency human contact line: [EMERGENCY_CONTACT_NUMBER].

GUARDRAILS & RESTRICTIONS

- NEVER make promises regarding exact pricing quotes outside the provided ranges.

- NEVER offer discounts or alter policy terms without explicit management instructions.

- Do not engage in discussions unrelated to [BUSINESS_NAME] services. Politely steer conversations back to business services.

- Hallucination Prevention: If you do not know an answer, respond: "I want to ensure I give you accurate details. I have logged your request, and our senior staff will call you promptly when we open at 08:00."
